Subject: Requesting support for upcoming Green Gurukul and Ecolympics competitions under Project YUWA

Respected Sir,

Greetings from Waste Warriors Society.

Waste Warriors Society has been actively working towards waste management, environmental conservation, and citizen engagement across the Indian Himalayan Region. Under our youth activation initiative, **Project YUWA (Youth United for Waste and Climate Action)**, we have been conducting various cleanliness and climate-related interventions, including cleanup drives, awareness campaigns, street plays, and community engagement activities.

The primary objective of these efforts is to contribute towards a cleaner and environmentally sustainable Dharamshala while encouraging young people to become active changemakers and responsible citizens.

As part of Project YUWA, two major competitions were successfully organized during 2024-25, receiving enthusiastic participation and support from educational institutions across the region:

1. Ecolympics (Inter-College Competition)

This competition is proposed to be organized during September-October 2026. During the previous edition, over 400 students from 16 colleges participated actively. Government College of Teacher Education, Dharamshala secured the first position, Government Degree College Dharamshala secured the second position, and Government Degree College Shahpur secured the third position.

2. Green Gurukul (Inter-School Competition)

This competition is proposed to be organized during August-September 2026. In its previous edition, 191 students from 5 schools participated enthusiastically. Army Public School, Yol secured the first position, Kendriya Vidyalaya secured the second position, and Tong-Len School secured the third position.

Encouraged by the success of these initiatives and the continued support of the administration, we are pleased to organize both competitions again this year. Through these interventions, students will engage in cleanliness drives, awareness activities, waste management initiatives, and climate action projects that foster civic responsibility and environmental stewardship.

In this regard, we kindly request your permission to implement these initiatives across schools and colleges across district Kangra. We would also be grateful if the Education and Higher Education Departments could extend their support by sharing a formal communication with educational institutions, encouraging their participation and highlighting the contribution of these initiatives towards civic engagement and Swachhta related efforts.

Please find attached a brief note on Project YUWA and the impact created through our work so far. We would be pleased to provide any additional information or present the initiative in person at your convenience.

We look forward to your positive consideration, guidance, and support.

Yours sincerely,

Shashank Prabhu
